Art Unit: 1732

**DETAILED ACTION**

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Specification***

3. The disclosure is objected to because of the following informalities: Appropriate headings should be used throughout the instant specification.

Appropriate correction is required.

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: PROCESS FOR SECURING A BRANCH ASSEMBLY TO A PIPELINE.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and

Art Unit: 1732

distinctly claim the subject matter which applicant regards as the invention.

7. Regarding claim 8, the phrase "or the like" (in lines 2 and 5) renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

#### ***Double Patenting***

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,612,341 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because: grout would have been obvious to one of ordinary skill in the art at the time the invention was made in the claims of the instant application in view of the '341 patent claims principally because grout is a

Art Unit: 1732

fluid material which also functions as a sealant (claims 5-8 of the `341 patent also recite grout); a fluid, sealant material would have been obvious to one of ordinary skill in the art at the time the invention was made in the `341 patent claims in view of the claims of the instant application principally because grout is a fluid material which also functions as a sealant; repair of a damaged pipeline would have been obvious to one of ordinary skill in the art at the time the invention was made in the `341 patent claims in view of the claims of the instant application principally because the process of securing a branch assembly to a pipeline recited in the claims of the instant application allows for repair of a damaged pipeline (see pages 1 and 11 of the instant application); hydraulic operation of jacking means would have been obvious to one of ordinary skill in the art at the time the invention was made in the claims of the instant application in view of the `341 patent claims principally in order to allow for smooth movement and operation of the jacking members and also because hydraulic jacks are conventional.

Since the claims of the later filed application issued first (as the `341 patent), a two-way obviousness double patenting rejection has been set forth above (see In re Braat, 937 F.2d 589, 19 USPQ2d 1289 (Fed. Cir. 1991)).

***Allowable Subject Matter***

10. Claims 7 and 9-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
